

# ECO WOODSTOVE CANCER RISK

All woodstoves pollute, including NEW EPA certified woodstoves

## FACT - WOODSMOKE IS TOXIC

It is harmful to everyone and

**DAMAGES:**

BRAIN

KIDNEYS

LIVER

LUNGS

REPRODUCTIVE SYSTEM

### Young children

are most vulnerable. Their nervous systems are still developing and they absorb **4-5 times more than adults**, which can cause:

- reduced lung development
- intellectual disability
- underperforming at school
- behavioural issues

### In adults

exposure increases the risk of:

- lung disease
- ischaemic heart disease
- stroke
- dementia

### In pregnant women

exposure damages many organs but also affects:

- the developing foetus

Air Pollution from residential woodburning is a human rights issue

## Secondhand Woodsmoke Kills

There are no safe levels of PM2.5 PAHs VOCs All class 1 Carcinogens
