

**REMEMBER  
THE DEAD**

**International Workers Memorial Day  
Tuesday 28 April 2009**

**FIGHT**  
For The Living

**Bad work makes you sick and may kill you  
but unions can make it better!**

Every year in this country, millions of people are made ill by their work, up to 50,000 die of work-related illnesses, 1,500 to 1,600 are killed in work related incidents and thousands are injured. Almost all of this ill-health, injury and death could be and should be prevented by employers removing or controlling the risks that cause them. But every day, poor workplace conditions create a great risk to our lives and our health. Workplaces with trade union safety reps are safer and healthier. Worldwide 2.2 million people are killed by work every year, more than killed by wars. Join us on International Workers Memorial Day in campaigning for good, safe, healthy jobs in all workplaces, that don't cost the earth and a society based on the need of the many rather than the greed of the few. We need to make sure that workers health and safety is not downgraded in this recession and that we try to make a better world of work for all. Come along, bring union banners and wreaths.

**Tuesday 28th April 2009**
